

Australia's Black Summer Bushfire Season

The most catastrophic Bushfire Season in Australia's recorded history.

27 Million
Hectars Burned

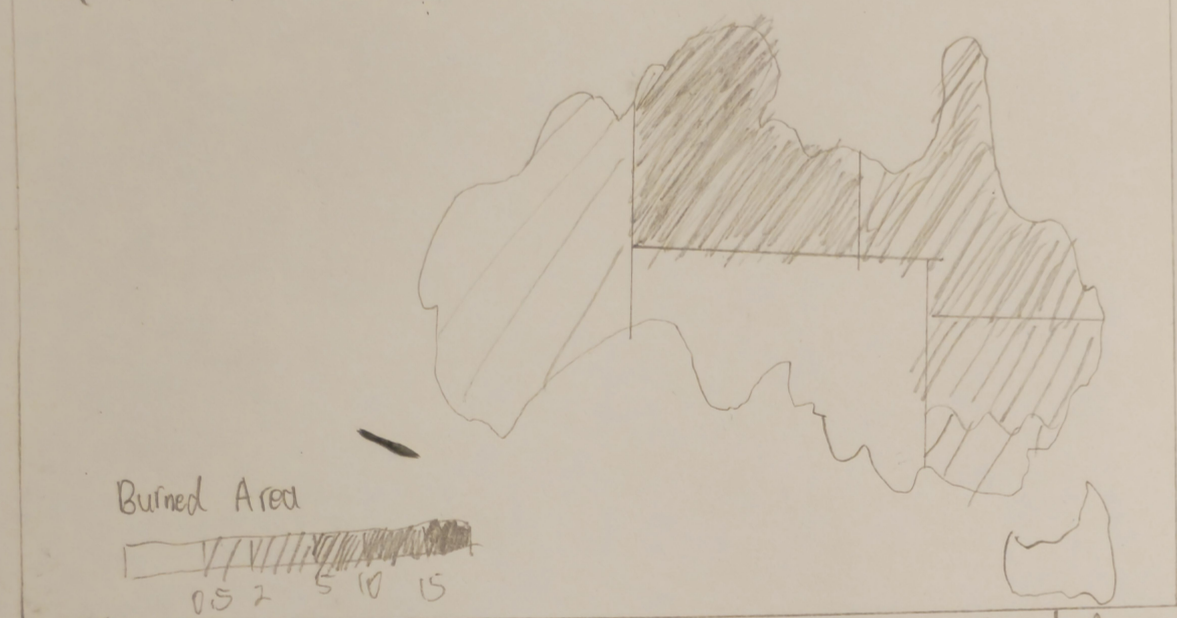

331
Species Affected

8
states and territories

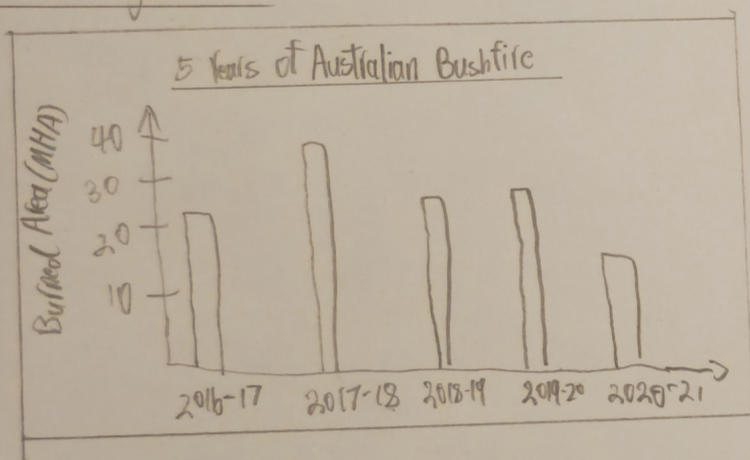

5
seasons Analysed

1. Where did it burn?

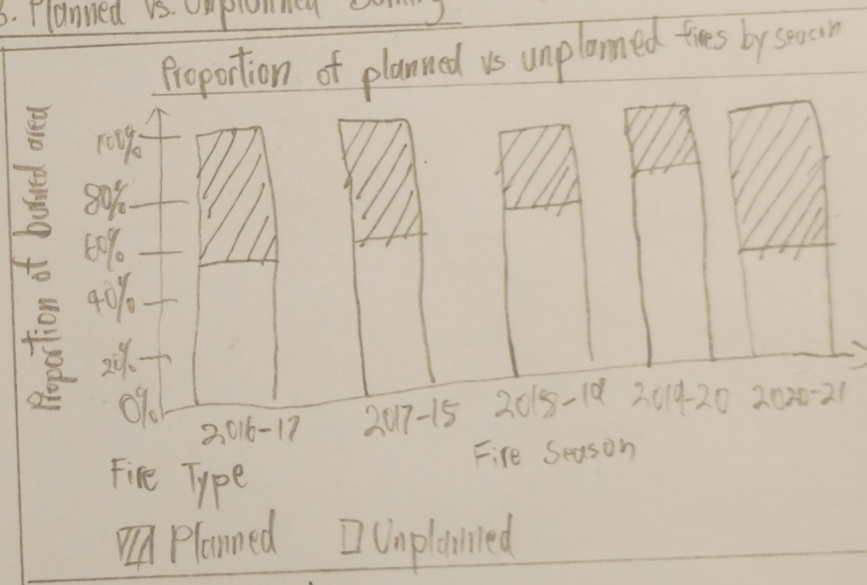

Forest Fire Extent Across Australia - Black Summer Season

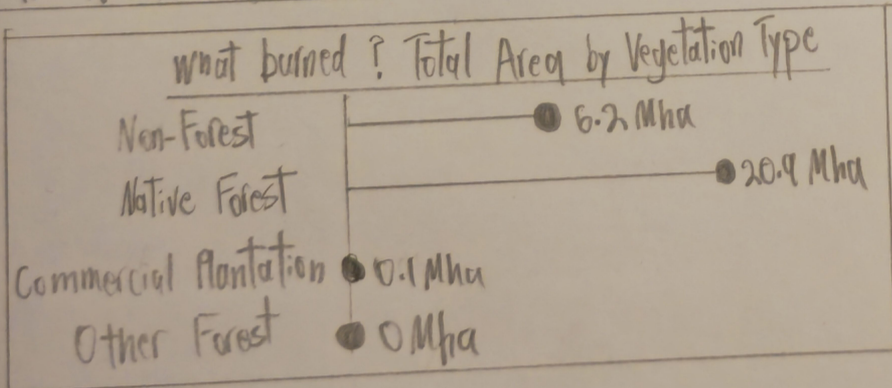

2. How big was it?

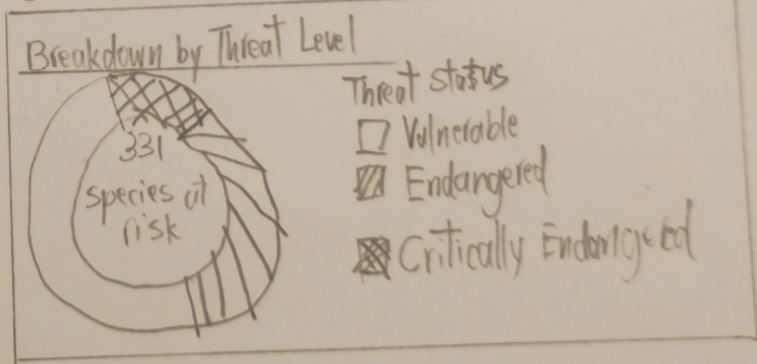

3. Planned vs. Unplanned Burning

4. What Burned?

5. The Ecological Toll

Conclusion

Unprecedented and a warning. Australia has always dealt with bushfires but Black Summer was far larger.
